

S2Biom summer school

17-20 May, 2016

National Technical University of Athens, Zografou Campus, Athens, Greece

Dear student/researcher

Are your research interests related to

- bio-based economy,
- resource efficiency,
- sustainable use of non-food, lignocellulosic biomass resources or
- development of software tools for localisation of biomass resources and designing of new value chains?

If so, you should take the opportunity to attend the S2Biom summer school.

By participating, you will:

- get updated about the latest developments of bio-based economy in Europe,
- get access to brand new software tools and datasets for planning, design and delivery of non-food biomass value chains,
- receive 4 days hands-on training by lecturers from the leading biomass, bio-economy research and policy institutions in Europe,
- ... and you will receive the certificate of attendance.

Extended deadline for the applications: **8th of May, 2016**

More information, including summer school agenda and application form, is available [HERE](#).

We look forward to welcome you in Athens!
